About the Agraya Academy

Capacity-building is one of Agraya GmbH's core focus areas. The Academy was founded in 2012 on the principle of spreading good agricultural practices around the world.

We do this by transferring our extensive certification experience and expertise to training and capacity-building programs. Our aim is offering targeted, up to date, and science-based training that is accessible worldwide, onsite and online.

Course options

PUBLIC COURSE

Online public courses offer the perfect learning experience for anyone interested in upgrading their professional knowledge and skills, as well as learning about the GLOBALG.A.P. system.

PRIVATE COURSE

All our courses can be delivered as private training sessions for your staff by our experienced instructors, either online or onsite, depending on your needs.

CUSTOMIZED COURSE

Work with our learning and development experts to build tailored solutions that meet your company's specific needs.

To work with our team of experts and develop customized training solutions, contact us at **academy@agraya.com**

About **our trainings**

Instructor-led sessions and/or self-paced courses for an enhanced learning experience

IFA v6 virtual farm tour, focusing on the real-world application of learning

Additional learning resources for ongoing learning beyond the training

Direct access to Agraya Academy staff for guidance and support

Dynamic learning experiences that foster **active participation,** questions, and discussion

GLOBALG.A.P. recognized certificate upon successful course completion

About **our trainers**

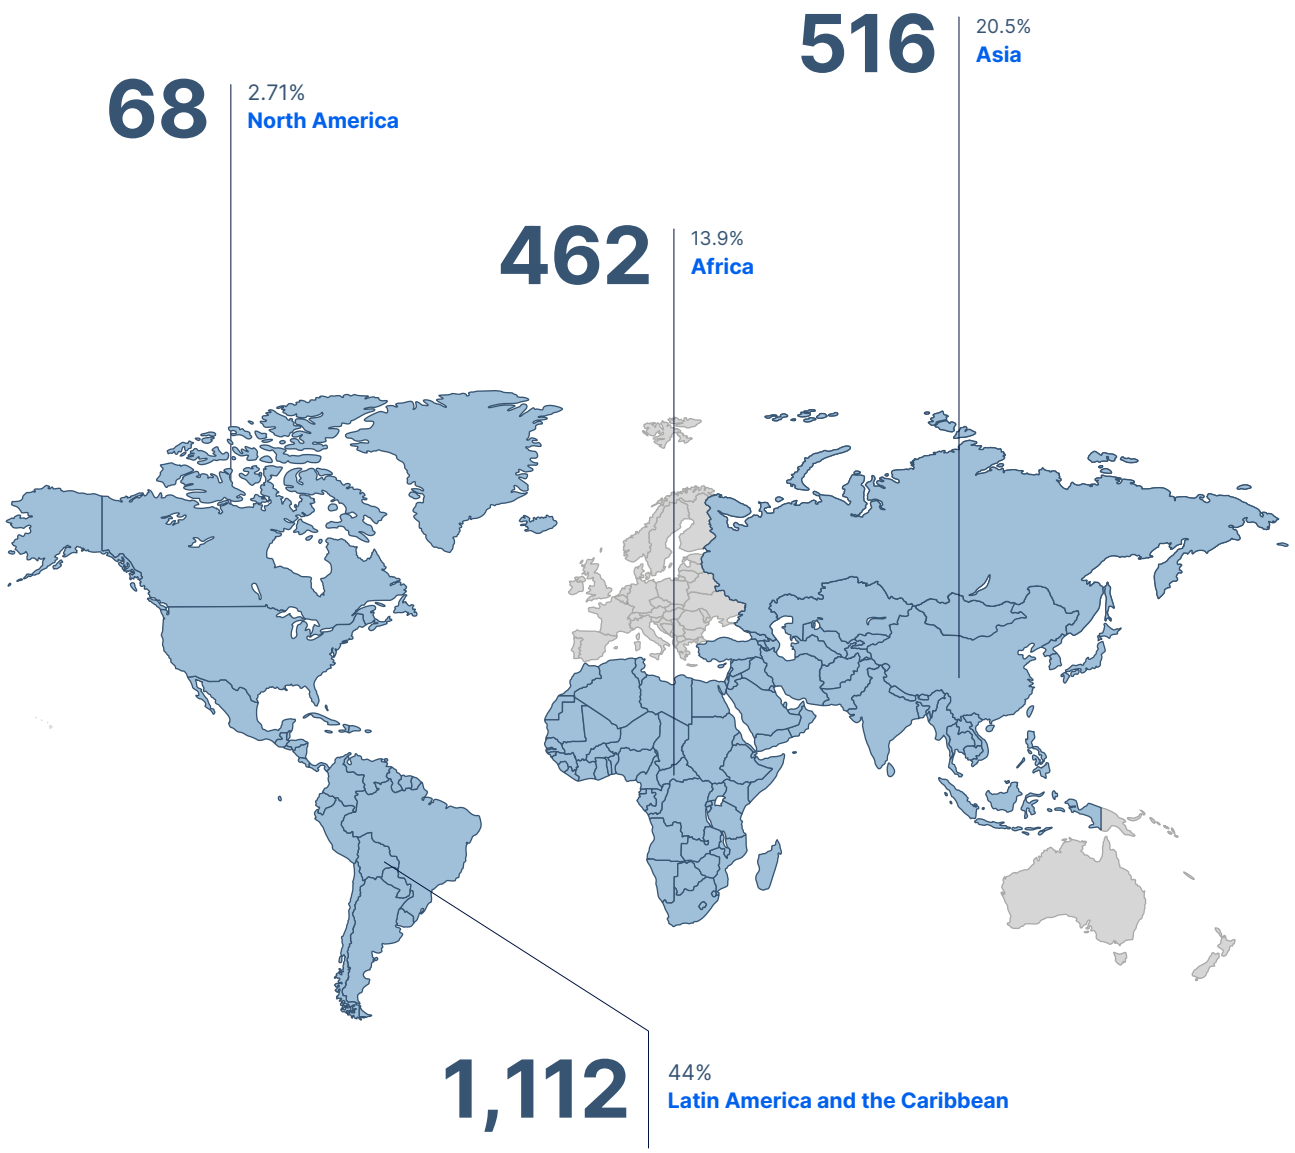

International trainers
Academy trainings are led by a global team of experienced trainers, ensuring diverse expertise and perspectives.

Evidence-base instruction
Trainers utilize rigorous, science-based teaching methods for effective and reliable learning experiences.

Continuous evaluation
Trainers are carefully selected, onboarded, regularly evaluated, and kept up to date with the latest industry insights.

Integrated Farm Assurance

Fruit and vegetables

IFA for fruit and vegetables is a global standard that promotes responsible farming practices at primary production level.

Developed in collaboration with industry stakeholders, the standard adopts a holistic approach that addresses major sector demands through transparent and globally recognized certification.

Available languages

EN ES FR JP PT RU

Course format

Online	**5 days:** 4 half-day sessions + 1 day proctored exam
Onsite	**3 days:** 3 full-day sessions, including proctored exam

Who is this for?

- Single and multisite producers, producer groups, and smallholders **aiming for certification**
- Producers seeking access to **global markets**
- Consultants and professionals in the **agricultural sector**
- Agriculture professionals interested in **becoming a Registered Trainer**

What will you learn?

- **The major aspects of primary production,** from preharvest activities to postharvest handling
- **Requirements** on food safety, traceability, environment, workers' health, safety, and welfare
- **The outcomes needed** to achieve GLOBALG.A.P. IFA certification

Learn more

Integrated Farm Assurance

Aquaculture

IFA for aquaculture is a global standard that promotes responsible farming practices at primary production level.

Developed in collaboration with industry stakeholders, the standard adopts a holistic approach that addresses major sector demands through transparent and globally recognized certification.

Available languages

ES EN

Course format

Online	**5 days:** 4 half-day sessions + 1 day proctored exam
Onsite	**3 days:** 3 full-day sessions, including proctored exam

Who is this for?

- Single and multisite producers and producer groups **aiming for certification**
- Producers seeking access to **global markets**
- Consultants and professionals in the **aquaculture sector**

What will you learn?

- **The major aspects of primary production,** from feed and hatchery to harvesting and transportation
- **International requirements** for responsible farming practices at all stages of production
- **Implementation guidelines** to achieve IFA certification for aquaculture

Integrated Farm Assurance

Quality Management System (QMS) & Internal Auditor Training (IAT)

The QMS and IAT establishes the requirements for managing internal processes, conducting internal inspections, and ensuring that all group members consistently comply with GLOBALG.A.P. requirements.

This enables certification bodies to evaluate the group's management system and verify its effectiveness through audits and inspections.

Available languages

EN ES JA PT

Course format

Online	**3 half-days** including non-proctored exam
Onsite	**2 days** including non-proctored exam

Who is this for?

- QMS managers and quality assurance personnel
- Producer group managers and administrators
- Internal inspectors and auditors
- Consultants and professionals supporting GLOBALG.A.P. implementation

What will you learn?

- The purpose and structure of the GLOBALG.A.P. QMS
- Maintaining a robust management system that supports continuous improvement and effective risk management
- Roles and responsibilities within a producer group's management system
- How to conduct internal inspections and audits

Learn more

GLOBALG.A.P. Chain of Custody

The CoC standard ensures that any product sold with a GLOBALG.A.P. claim or bearing a GGN label is truly sourced from a GLOBALG.A.P. certified production process.

The standard requirements secure the segregation, traceability, and therefore integrity of a product's certification status throughout its lifecycle from farm to consumer.

Available languages

EN ES PT

Course format

Online	**2 half-days**
Onsite	**1 day**

Who is this for?

- **Producers and subcontractors** within the supply chain
- Any **company handling or trading** in products originating from GLOBALG.A.P. certified production processes
- **Consultants** and professionals in the agricultural sector
- **Registered Trainers**

What will you learn?

- **Certification requirements and monitoring tools,** mitigating the risk of food fraud or traceability issues
- **Management structure,** input and output verification, traceability, identification and labeling
- **Implementation guidelines** for the requirements of CoC

Learn more

Compound Feed Manufacturing

CFM is a globally recognized certification standard for the production of compound feed for aquaculture and livestock, covering the entire feed manufacturing process.

This supports feed manufacturers in meeting market requirements while promoting feed safety, responsible sourcing, traceability, and sustainable production practices.

Available languages

ES EN

Course format

Online	**3 half-days**
Onsite	**2 days**

Who is this for?

- **Manufacturers** seeking to supply their products to aquaculture producers with IFA certified production processes
- **Feed mill and quality managers** seeking to implement CFM
- **Internal auditors and compliance staff**
- **Consultants** supporting CFM implementation
- Professionals working in the **aquaculture and livestock feed sectors**

What will you learn?

- **Practical knowledge on how to comply** with CFM requirements
- **Certification process** and annual audit requirements
- **Stages of production,** from the purchase and handling of raw materials to the processing and distribution of finished feed
- Implementing **traceability, feed safety, and responsible sourcing practices**

Learn more

TR4 Biosecurity for Bananas

The TR4 Biosecurity Standard outlines a risk mitigation plan for minimizing the spread of the Tropical Race 4 fungus, also known as Foc TR4 – one of the most destructive diseases in banana and plantain crops – to, within, and from farms.

It is designed for producers who do not have another form of GLOBALG.A.P. certification.

Available languages

EN ES

Course format

Online	**1 half day**
Onsite	**1 day**

Who is this for?

- **Producers** or members of a cooperative producing bananas or plantains
- **Certification and verification bodies**
- **Professionals and consultants** in the agricultural sector
- **Supply chain stakeholders** interested in the responsible sourcing of bananas

What will you learn?

- **Practical preventative measures** of containing the disease and protecting the livelihoods of banana and plantain producers
- **Risk mitigation plan** for minimizing the spread of Foc TR4
- TR4 threat/**Pathogen awareness**

Learn more

Primary Farm Assurance

PFA is the gateway to GLOBALG.A.P. certification for producers in emerging markets and developing economies.

PFA provides a gradual progression towards Integrated Farm Assurance (IFA) certification. There are three levels, each with progressively higher requirements:

- Entry Level
- Intermediate Level
- Advanced Level

Available languages

EN ES PT

Course format

Online	**2 half-days** including non-proctored exam
Onsite	**2 days** including non-proctored exam
Self-paced (CB/VB approvals)	

Who is this for?

- **Small-scale and emerging producers** seeking to work towards GLOBALG.A.P. IFA certification
- Producer seeking to gain access to **local and regional markets**
- **Verification bodies**
- **Registered Trainers**
- Consultants

What will you learn?

- **The stepwise approach** towards GLOBALG.A.P. certification through the three levels
- **Basic requirements** on food safety, traceability, environment, workers' health, safety, and welfare
- **Responsible farming practices** that support the improvement of farm management

Learn more

GLOBALG.A.P. Risk Assessment on Social Practice

GRASP aims to support the evaluation of workers' health, safety, and welfare at farm level. It offers a simple yet robust evaluation checklist that producers can use to assess, improve, and demonstrate their responsible social practices.

Developed in collaboration with industry experts, GRASP covers a broad spectrum of social challenges faced by the world's farms.

Available languages

EN ES PT

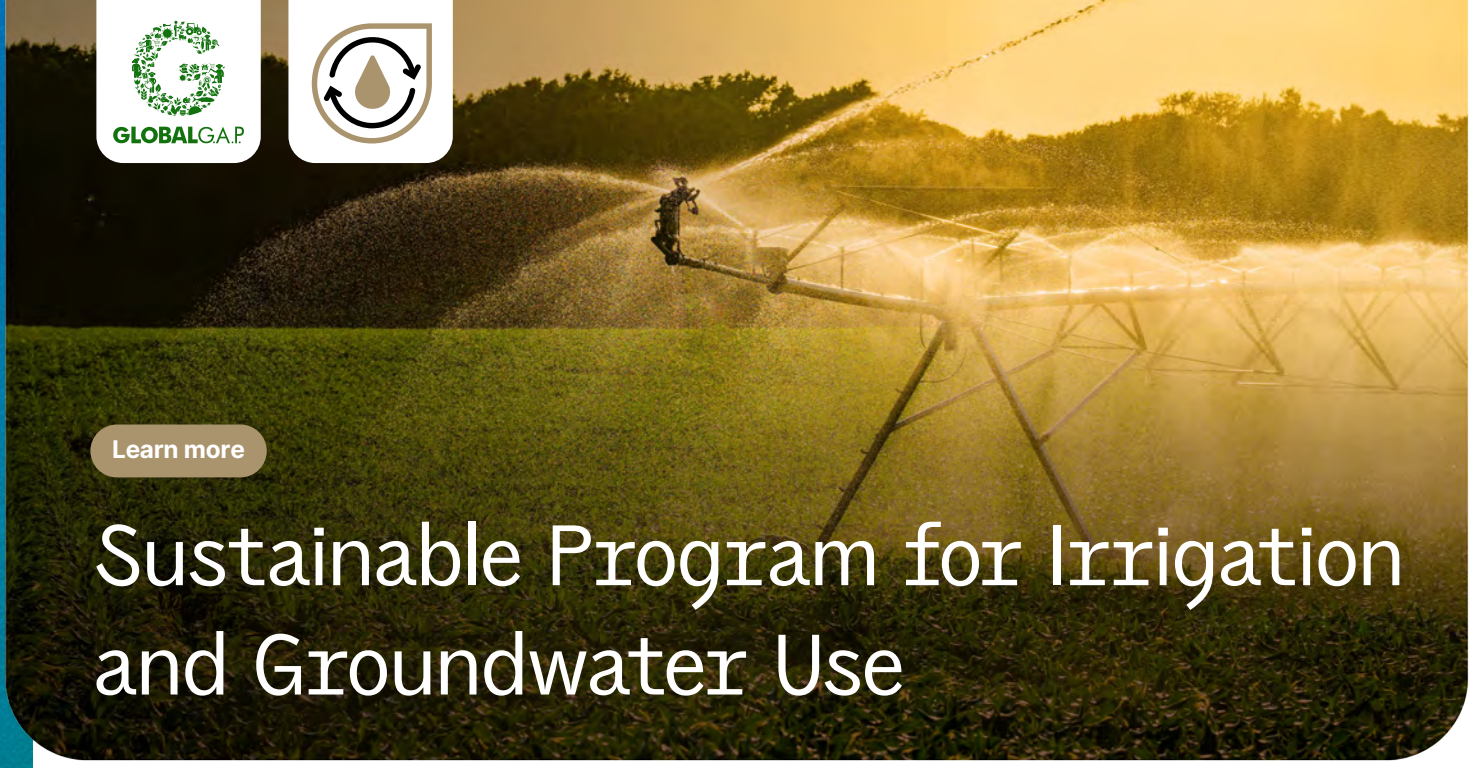

Course format	
Online	**2 half-days**
Onsite	**2 days**

Who is this for?

- Producers, from smallholders to larger cooperatives, with hired or subcontracted labor and family farms wanting to improve and demonstrate their responsible social practices
- **Professionals and consultants** in the agribusiness sector

What will you learn?

- The GRASP requirements, covering a broad spectrum of **social challenges** faced by the world's farms
- Registration, the audit process, and continued **requirements for GRASP compliance**
- Core topics including workers' voice, human and labor rights information and indicators, and child and young workers' protection

Learn more

Sustainable Program for Irrigation and Groundwater Use

SPRING aims to address responsible water management practices at farm level. It is designed to be paired with the Integrated Farm Assurance (IFA) standard for plants.

The add-on supports global producers, supply chain stakeholders, and buyers to demonstrate their commitment to more responsible on-farm water stewardship.

Available languages

EN ES PT

Course format

Online	**2 half-days**
Onsite	**1 day**

Who is this for?

- **Individual producers, multisite producer groups, and smallholders** wanting to improve their water management practices or gain access to markets requiring SPRING certification
- **Professionals and consultants** in the agribusiness sector
- **Supply chain stakeholders** interested in sourcing products audited against criteria on for re-sponsible water management

What will you learn?

- **Legal compliance** and the criteria on land use, flow rates, watershed stakeholders, and water source identification
- Assessing farm and produce handling unit **water risks**
- **Management and use of water resources,** water distribution, irrigation, measurement systems, and consumption records
- **Environmental management,** protecting water sources, and wastewater management

Learn more

Food Safety Modernization Act (FSMA) Produce Safety Rule (PSR) add-on

The Food Safety Modernization Act (FSMA) Produce Safety Rule (PSR) add-on aims to address the specific requirements of the US Food and Drug Administration (FDA) for the production, handling, and storage of fruit and vegetable products.

It is applicable globally for producers exporting to the US market and has been officially recognized by the FDA.

Available languages

EN ES

Course format

Online	**2 half-days**
Onsite	**1 day**

Who is this for?

- **Producers** of fruit and vegetables wishing to supply the US market
- **Professionals and consultants** in the agricultural sector
- **Supply chain stakeholders** working in or considering exporting to the US market

What will you learn?

- **Guidelines for production, handling, and storage** of fruit and vegetable prod-ucts destined for the US market
- How to develop and implement a **food safety plan**
- The specific **requirements of the FSMA PSR** at farm level

We also offer the PSA Grower Training as a standalone private course. Please contact us at academy@agraya.com. Learn more about private and custom courses on page 17.

Learn more

FSMA + Produce Safety Alliance (PSA)

Grower Training

In combination with FSMA, the Grower Training has been designed to provide a foundation of Good Agricultural Practices knowledge with emphasis on co-manage-ment of food safety and environmental man-agement goals, while covering the FSMA PSR requirements.

The PSA Grower Training is one way to satisfy the FSMA Produce Safety Rule. Upon successful completion participants re-ceive a certificate issued by the Association of Food and Drug Officials (AFDO).

Available languages

EN ES

Course format

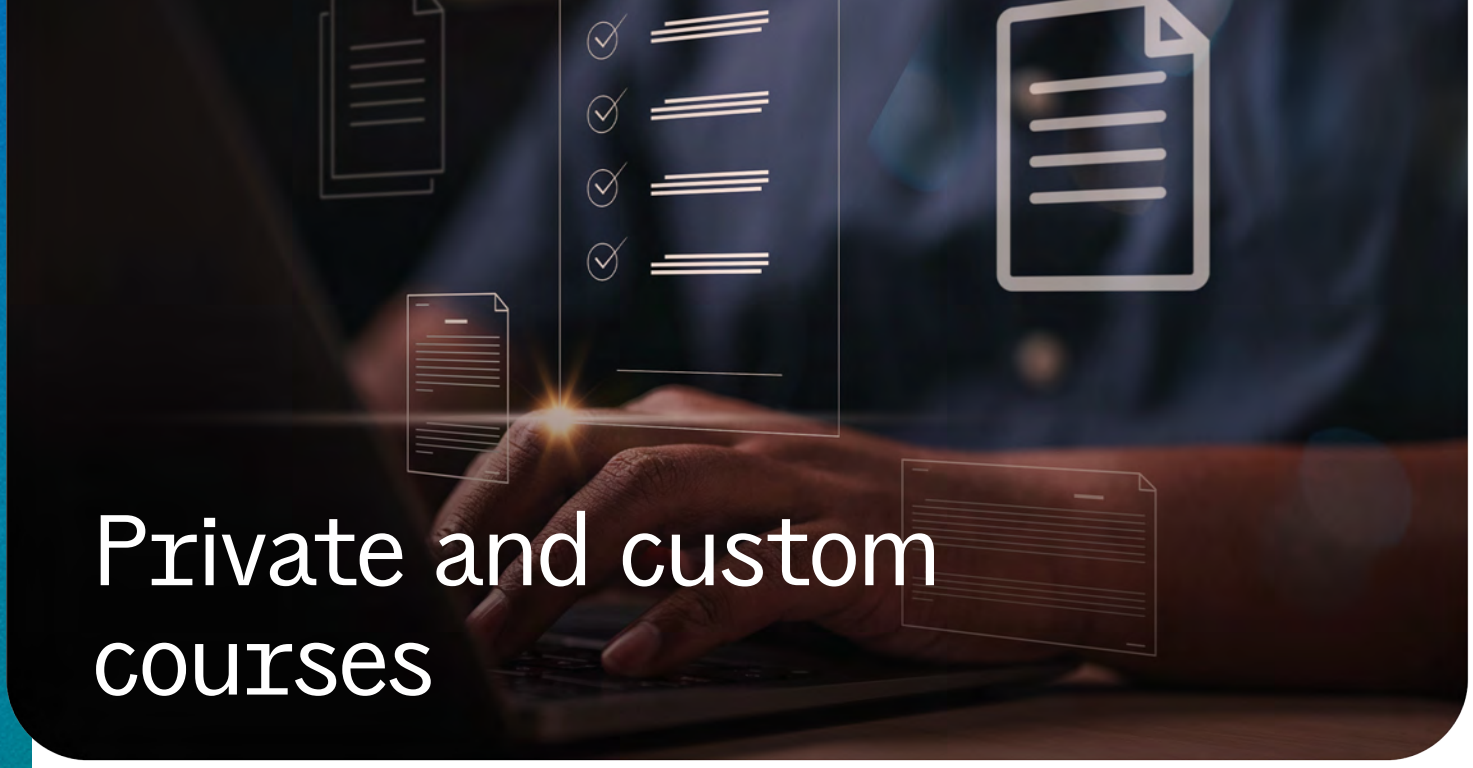

Online	**2 half-days**
Onsite	**1 day**

Who is this for?

- **Farm supervisors or responsible parties** requiring FDA-recognized food safety training
- **Producers** of fruit and vegetable wishing to supply the US market
- **Supply chain stakeholders** working in or considering exporting to the US market

What will you learn?

- **Produce safety best practices,** key requirements of the FSMA Produce Safety Rule
- How to **identify microbial risks,** practices that reduce risks, and how to implement produce safety practices on the farm
- How to write a **farm food safety plan**

Private and custom courses

All our courses and webinars can be held as private trainings for your team. Work with our experts to develop customized training solutions for your specific needs.

How to request a private or customized course

1. Contact us with your request at **academy@agraya.com**
2. Discussion about your requirements
3. We propose an offer
4. Contract agreement and payment
5. The course takes place

Please note that custom courses may take three months to prepare.
